

GENERAL CONFERENCE DELEGATES ARE BEING ELECTED BY MINISTERS

Four Chosen and Two More Will be Named After Ballot is Taken This Evening

ADDRESS DELIVERED BY NEW YORK EDITOR

Second Year Trial Class Taken Into Conference Today and Addressed by Bishop Earl Cranston ---Report of Conference Trustees---Dr. Clemons Presents \$400 Draft to Ohio Conference.

A ballot taken this afternoon elected four delegates to the general conference at Minneapolis, after which the balloting was postponed until this evening at 7.15 o'clock, when two more delegates will be elected. In this afternoon's balloting there were 197 votes cast, seven of which were defective. This left 190, necessary to a choice, 96. The following were the successful candidates.

- Herbert Scott, superintendent of the Columbus District, 154.
- P. A. Baker, national superintendent of the Anti-Saloon League, 121.
- L. L. McGee, superintendent of the Portsmouth District, 113.
- Levi Guilbert, editor of the Western Christian Advocate, Cincinnati, 100.

The opening of the Ohio Conference on Thursday morning was marked by a devotional meeting, which teemed with earnest solicitation for the best spirit to pervade the work of the day. Probably the most interesting feature of Thursday's work was the anticipation of the election for delegates to the General Conference, held only every four years and this year to be held at Minneapolis. The delegates' election from the ministers began at 10:30 this morning and there will be six elected. On Friday the laymen will meet and name their delegates to the conference.

Rumor in the conference has it that different ministers will be selected to the conference, but the names of those mentioned are: Rev. M. McGee, superintendent of the Portsmouth district; Rev. Herbert Smith, superintendent of the Columbus district; and our own Rev. L. C. Sparks, pastor of the First M. E. church of Newark. The other three do not seem so certain.

During the devotional hour a delightful discourse was given by Dr. Edward S. Lewis, a prominent worker of New York City. Dr. Lewis is the assistant editor of the Sunday school publications of the Methodist Episcopal church.

The conference business opened with the reading of the minutes and roll call. The following class on trial for the second year were taken into full connection this morning: Charles Graham, L. C. Watts, R. R. Allaire, G. T. Howard, T. M. Spurrier, S. C. Eliska, C. I. Hargraves, A. T. Hughes, and A. R. Farrar, transferred from the Christian Union church.

Bishop Cranston addressed the class giving them advice which will be of great worth to them in their work. Bishop Cranston said that the old or he grew the less he thought of a Christian prerogative. A judge must stand upon his prerogative, and so must a legislator, a minister in some cases must fall back upon this. The expression, "my authority," however, should be omitted from the vocabulary of either minister, bishop or superintendent, and that a Christian minister should come to power through the recognition of his flock.

Bishop Cranston said that no minister should permit any committee to time or appoint the time which should be devoted to his sermon or duties. He said that encroachment on his duties should be looked upon with prudential interest which should be developed to prudential firmness. The bishop said that some literature could be boiled down to half and even to one-third and then there would be nothing worth reading. Dr. Cranston in his reference to the preparing of sermons paid a nice little compliment to Dr. Guilbert. The presiding bishop then asked the class questions. Bishop Cranston said the main thing was to know "the way of God."

The vastness of life was touched upon by the speaker, as was the great subject of regeneration. The bishop deplored the fact that commercialism had entered into the work of min-

OLDEST MEMBER OF CONFERENCE.

One of the most interesting members attending the conference is the Rev. W. C. Holliday of Columbus. At the roll call on Wednesday morning the first name on the list was the Rev. Mr. Holliday, and this honor is due to the fact that he is the oldest member in attendance. That is, the oldest in rank. The first conference the Rev. Mr. Holliday ever attended was the conference held here in 1856 and since that time he has never missed a session. In all these years of roll call Rev. Mr. Holliday has never failed to answer "present."

The reverend gentleman was the youngest member ever admitted, entering at the age of 17 years, and he remained the youngest man for three years. Rev. Mr. Holliday's father was a Methodist minister before him, and from the time he was one year old he traveled the circuit with his father, and on his reaching the ministry he again traveled the ways of the circuit rider.

During 56 years this interesting man of the gospel has devoted his time to the followers of the principles of Methodism.

BLACKSMITH STATE TREAS. WHIPS AGENT

COLORADO STATESMEN TAKE PART IN 15 MINUTE BOUT IN CAPITOL BUILDING.

Kenchan Struts About Looking For Trouble While Governor Tries to Prevent Further Fighting.

Denver, Colo., Sept. 28.—Rody Kenchan, Colorado's blacksmith state treasurer walked around the state house with a chip on his shoulder today following his encounter with Wm. R. Freeman, tax agent for the State Fe. R. R. In the meantime other state officials from Governor Safford on down are watching Kenchan to see that there is no repetition of the encounter. The mill lasted 15 minutes. Kenchan accused Freeman of threatening to "punch his face." Freeman cheerfully admitted it. The men grappled. The governor, attorney general and secretary of state stopped the battle and the governor clung like a bull dog to the treasurer's coat-tails. Other dignified state officials pinned Freeman down. After the governor had locked the state treasurer in a room he told Freeman to "beat it," which Freeman did.

SAYS DIEGEL TRIAL MORE LIKE A FIGHT

ATTORNEYS CLAIM IT WAS THE MOST INFAMOUS CASE EVER PROSECUTED IN ANY COURT.

Circuit Court Gets Case On Appeal, and Will Go Over Thousands of Pages of Briefs.

Columbus, Sept. 28.—Arguments on the petition in error filed by attorneys for R. J. Diegel, senate sergeant-at-arms under a three-year penitentiary sentence for complicity in state house bribery, were commenced before the circuit court here today. Diegel is represented by Attorneys Belcher, Connor, Mattern and Andrews, who also represent other indicted legislators.

DEMOCRATIC LEADERS WILL ASSIST IN DRAFTING BILL FOR REDISTRICTING STATE

Columbus, Sept. 28.—That there has been no cessation of the movement to redistrict the state for congressional purposes was demonstrated yesterday through the meeting of the special committee appointed two weeks ago by a conference of Democratic Congressmen. In pursuance of the decision of the majority which named the committee it was decided to construct a gerrymandering bill, which would be first submitted to the Democratic members of Congress and the General Assembly for approval. If this is obtained Governor Judson Harmon will be requested to summon an extraordinary session of the Assembly.

The most important action yesterday was the decision to request State Oil Inspector William L. Finley and Insurance Commissioner Edmund H. Moore to act in conjunction with Senator Thomas A. Dean of Fremont, and Representative William D. Fulton of Licking county, who are the chairman of the Federal Relations committee of both branches of the Assembly, in drafting this tentative bill.

New York, Sept. 28.—The operation of the first official aero mail service by the United States government has attracted wide attention. The route is from Mineola, N. Y., to Jamaica, N. Y. Earle Ovington, the aviator, was handed the first bag by Postmaster General Frank H. Hitchcock. The aero mail receiving station, shown in the accompanying photos, is located on Nassau boulevard near Mineola.

PATTERSON DRIVEN FROM HIS WIFE'S BUNGALOW BY VISITOR

Chicago, Sept. 28.—Two letters written by Chas. A. Patterson shortly before his tragic death in Denver Monday, have been received by his brother, P. S. Patterson, an attorney of Chicago.

Attorney Patterson, in an effort to clear his brother's name of the charge of relinquishing his wife to a Chicago millionaire for \$1500, made public the contents of the letters.

One letter told of a call made by Patterson last Saturday evening on Mrs. Patterson.

The letter, Attorney Patterson asserted, said the writer, in company with a friend, a singer, had gone to the bungalow occupied by Mrs. Patterson. As they approached they saw her with a man on the porch. She, upon seeing her husband, ran into the house.

The man drew a revolver and pointed it at the writer, saying, "Hold up your hands and get away from here, which yours truly did," the letter stated, according to the attorney.

ONE KILLED IN FIRE AT WICHITA, KAS.

Wichita, Kansas, Sept. 28.—One fireman was killed and three others are still missing as a result of a fire which started late last night in the wholesale district and was not under control until today. The fire was beyond control when the first engine arrived and fanned by a strong wind it spread rapidly to adjoining buildings. The loss will exceed half a million dollars.

MORPHINE IN STOMACH OF SISTER

Alleged Drug Fiend is Charged With Soror- icide at New Orleans

OTHER DEATHS IN FAMILY

Under Suspicious Circumstances Cause for Exhuming Their Bodies.

New Orleans, Sept. 28.—The police claim to have discovered a modern Lucretia Borgia in the person of Annie Crawford, an alleged drug fiend, who was arrested last evening on the charge of poisoning her sister Elise a pretty stenographer.

Three other members of the Crawford family have died under mysterious circumstances within the past fifteen months, and the prisoner is said to have been the beneficiary named in the insurance policies on their lives.

Elise Crawford died suddenly last Sunday and under circumstances so suspicious that the coroner had the contents of the stomach analyzed. The finding of enough morphine to kill at least two persons was followed by the arrest of the sister.

The authorities indicated that the bodies of the three other members of the family would be exhumed for a similar examination.

District Attorney Adams declined to have been the beneficiary named in the insurance policies on the murder of all four members of the family, but he dictated the following statement:

"It was established today that Annie Crawford is a drug fiend and probably is addicted to morphine. It is also established that she had access during the past three weeks to morphine and was in a position to obtain it in practically any quantity during that period.

"During the indisposition of Elise Crawford she bitterly complained that her food and drink were doped. 'I have charged Annie Crawford with the murder of her sister Elise.' For five hours the Crawford girl was under examination by the police. The officers assert that she made a partial confession.

Annie Crawford is of small stature. A wealth of dark hair arranged in an elderly fashion causes her to look older than her 29 years. She frustrated every attempt of the newspaper photographers to get her picture by persistently holding a large black fan before her face.

The first of the Crawford household to die was Miss Mary Agnes Crawford, sister of the prisoner. Her demise occurred June 25, 1910, suddenly, and supposedly of acute meningitis. Three weeks later, July 15, her father died, uraemic poisoning being given as the cause.

Annie Crawford, the prisoner held insurance policies on the lives of the decedents in the following sums: Walter C. Crawford, father, \$800; Mrs. Crawford, mother, \$400; Mary Agnes Crawford, sister, \$300; Elise Crawford, sister, \$250. She collected the insurance in each case except that of her sister Elise, payment of which was withheld pending receipt of the certificate of death.

On Monday morning following her sister's death Annie made demand on the insurance company for the money. On that day she went to the railroad office where her sister had been employed as stenographer and collected \$45 salary due.

The prisoner also holds an insurance policy on the life of her younger sister, Gertrude, who admitted to the district attorney today that she is afraid of Annie.

For several years Annie Crawford had charge of the drug department of the Presbyterian Hospital. She lost her position there more than a year ago, following the disappearance of a quantity of drugs.

A remarkable feature of the case," said a police official, "is that practically every cent Annie Crawford collected on the several insurance policies was spent for clothes. She also spent a good deal of money

WILL INSPECT GIRLS' HOME

The Board of County Visitors, composed of C. L. V. Holtz, D. M. Keller, T. B. Fulton, Mrs. Fred Seymour of Cranville, Mrs. J. B. Jones and Ida M. Chase, will go to Delaware, O., on Friday for the purpose of inspecting the Girls' Industrial home.

USED KEROSENE ON THE FIRE; FIVE ARE DEAD

Three Others Will Die as Result of
Unwise Use of Oil Can.

Mitchell, Ill., Sept. 28.—Five members of one family were incinerated and three others so seriously burned that they will die as a result of an attempt by Virgil Vanderer to replenish a kitchen fire with kerosene.

The dead: Mrs. Virgil Vanderer, Gertrude, 16; Bessie, 13; Earl, 6; Waldo, 4.

The dying are Virgil Vanderer, 36; Theryl, 8; C. Frankford, 18, a stepson.

TO CALL STRIKE SATURDAY A. M.

Chicago, Sept. 28.—According to one of the highest officials of the system, the Federation of the Harman lines, a strike of the federation men is inevitable and will be called Saturday morning. Pres. J. W. Kline of the blacksmiths and helpers intimated today that three impending strikes is likely to involve all the western lines and perhaps tie up the entire railroad system of the country.

"This is a crisis between capital and labor," said Kline, "and we may as well fight it out now."

STOMACH LIVER LUNGS

Each of the chief organs of the body is a link in the Chain of Life. A chain is no stronger than its weakest link, the body no stronger than its weakest organ. If there is weakness of stomach, liver or lungs, there is a weak link in the chain of life which may snap at any time. Often this so-called "weakness" is caused by lack of nutrition, the result of weakness or disease of the stomach and other organs of digestion and nutrition. Diseases and weaknesses of the stomach and its allied organs are cured by the use of Dr. Pierce's Golden Medical Discovery. When the weak or diseased stomach is cured, diseases of other organs which were remote from the stomach but which have their origin in a diseased condition of the stomach and other organs of digestion and nutrition, are cured also.

The strong man has a strong stomach.
Take the above recommended "Discovery" and you may have a strong stomach and a strong body.

TROOPS LAND UNDER GUNS OF THE FLEET

Rome, Sept. 28.—Word is momentarily expected here that Tripoli, Benghazi and Derna have been occupied under the protecting guns of the Italian fleet. The entire navy is now in commission and most of it is en route to the scene of activities. It is admitted here that the action of Turkey in sending a transport to Tripoli in disregard of the Italian government's suggestion, constituted a defiance that cannot be pardoned. Despite the strong opposition of the socialists the clash with Turkey which everybody considers inevitable is welcomed by the majority of Italians.

WAR IS INEVITABLE.

London, Sept. 28.—Immediate hostilities are looked for in Tripoli. Advances from Constantinople state that the Italian government through its representative there has handed to Turkey an official note declaring that Turkey's reply to the Italian ultimatum is unsatisfactory. All hope of a peaceful settlement has been abandoned by the European powers and war is declared to be inevitable.

TODAY'S DEVELOPMENTS IN THE TURKO-ITALIAN SITUATION.

Italian war fleet reported to be lying off Tripoli prepared to cover the landing of a force of men now on a transport.

Second division Italian fleet sailed under sealed orders believed to be destined to block all Turkish ports.

Turkish reinforcements and ammunition landed at Tripoli.

Italian Charge d'Affaires in Constantinople expected to ask for his transportation home.

Turkey disappointed at failure of powers to protect her now suggests trade concessions to Italy if territorial sovereignty is respected.

Germany greatly excited trying to devise means of peaceful settlement of the contention.

England alarmed over general uprisings in Tripoli.

French and German warships sails for Tripoli to protect foreign interests.

JEWISH SOLDIER PROMOTED.

Washington, Sept. 28.—Private Frank Bloom, Battery C, Third Field Artillery, the young Jewish soldier who failed in his first efforts to secure a commission in the army and to whom President Taft allowed a second examination, today was ordered promoted to be second lieutenant.

End of the Honeymoon.

It was along toward the waning of the honeymoon that this dialogue took place:

"Are you sure that you love me as much as ever?"

"Perfectly sure."

"And you will never, never love anybody else?"

"Never, never."

"Is there anything you wouldn't do to make me happy?"

"Nothing within the bounds of reason."

"Aha! I thought so! You have begun to reason. The honeymoon is over!"—Cleveland Plain Dealer.

When Beecher "Hollered."

Coming home from the morning service one Sunday Dr. Beecher threw himself on a lounge and said in a tone of deep dejection, "I believe that was the worst sermon I ever preached." One of his daughters protested that she had seldom heard him when he was more energetic. "Oh, yes," was the impatient reply, "when I haven't anything to say I always holler."—Outlook.

Their Use.

"Why do you have those glass cases with the ax, hammer, crowbar and so forth on these cars?" asked a traveler on the railroad going to New York.

"Oh, those are put there in case any one wants a window open," replied the facetious man.—Youth's Companion.

DYSPEPSIA IS RELIEVED IN FIVE MINUTES

You can eat anything your stomach craves without fear of indigestion or dyspepsia, or that your food will ferment or sour on your stomach, if you will take a little Diapiesin occasionally.

Your meals will taste good, and anything you eat will be digested; nothing can ferment or turn into acid or poison or stomach gas, which causes Belching, Dizziness, a feeling of fullness after eating, Nausea, Indigestion (like a lump of lead in stomach), Bloating, Heartburn, Water brash, Pain in stomach and intestines or other symptoms.

Headaches from the stomach are absolutely unknown where this effective remedy is used. Diapiesin really does all the work of a hearty stomach. It digests your meals when your stomach can't. A single dose will digest all the food you eat and leave nothing to ferment or sour and upset the stomach.

Get a large 50-cent case of Pape's Diapiesin from your druggist and start taking now, and in a little while you will actually brag about your healthy, strong stomach, for you can eat anything and everything you want without the slightest discomfort or misery, and every particle of impurity and gas that is in your stomach and intestines is going to be carried away without the use of laxatives or any other assistance.

Should you at this moment be suffering from indigestion or any stomach disorder; you can surely get relief within five minutes.

SENATOR CUMMINS SNUBS TAFT

Fort Dodge, Iowa, Sept. 28.—Real Iowa insurgency in the person of Senator A. E. Cummins, gave President Taft what the four hundred call "a snub direct" today.

Cummins had refused to ride on the presidential train while the president was making his short campaign through the state. The president talked properly and the snub and defended his voters of the Democratic insurgent tariff bills in all his speeches today. Thousands of townsmen turned out to hear him, but there was little enthusiasm.

The Iowa farmers seemed to want to hear what the president had to say and then take it home with them and think it over. There was no expression of approval or disapproval.

INDIAN CHIEF AGED 108 DEAD AT ST. IGNACE

St. Ignace, Mich., Sept. 28.—With the death of Chief Satago here last night there passed away one of the most noted and stirring personages in Northern Michigan. Chief Satago, as the tribe called him, was the last great Sachem of the once powerful Chippewa Nation, and the few survivors of the tribe are little more than remnants of their former greatness. Chief Satago was 108 years old at the time of his death.

Long since despoiled of the hunting grounds in the Straits region, the de-throned monarch's later years were ones of poverty. Chief Satago was a faithful living epic in himself. He faithfully recorded in his memory the ancient legends, songs, history and traditions of his people, which were handed down to him from untold generations by Chippewa Chiefs. From Chief Satago the poet Longfellow gleaned much material for that charming epic of Indian life, "Hiawatha."

In the lodge of Chief Satago the poet spent much of his time more than half a century ago, when he was in this North country in search of material.

Most vividly did the old Chief describe the horrible torture and massacre of Ft. Michilimackinac in which his father played a leading role. His father, who was the most feared Chief of the North, was Pontiac, right bower in his stuporous plan to overthrow the English in the Northwest. Chief Satago had a smattering of education, picked up at the mission school.

Satago was a devout Roman Catholic, his ancestors having been converted by Father Marquette.

Satago was for years a familiar figure to resort visitors in the northern peninsula of Michigan who visited St. Ignace, a short distance across the lake from Mackinac Island. He lived at the extreme north end of the city in a small Indian settlement and his cabin floor was always scrupulously clean, and scrubbed daily. He had for a time Indian souvenirs on sale, which was his means of gaining a livelihood. Satago was known to a number of Newark people.

NEWARK HIGH IS PREPARING FOR A GOOD SEASON

The Newark high school football team is preparing for a successful season on the gridiron this fall and the first real contest will be played tomorrow with the team from Granville. The game will be played on the Y. M. C. A. ground.

A schedule has been arranged, booking six games, three at home and three abroad, with two open dates yet to be filled. The schedule is as follows:

Oct. 7—East High at Columbus.
Oct. 21—Mt. Vernon at Newark.
Nov. 4—North High at Newark.
Nov. 11—Cambridge High at Cambridge.

Nov. 18—Doane Academy at Newark.
Nov. 25—Zanesville High at Zanesville.

Oct. 28 and Nov. 30 are open dates.

The training of the eleven is in charge of Physical Director Wright of the Y. M. C. A., and there is every indication that the local school will have a fast team.

LAST AMATEUR GAMES OF SEASON

Sunday will see the last amateur game scheduled for this season. The C. M. A. team will stack up against two city amateurs, the Heiseys and the Anchors. The first game will be called at 1:30 o'clock and the second immediately after the conclusion of the first. Only one admission will be charged for the two games.

If women would take a few minutes' rest every once in a while during the day they could get lots more work done. It's the constant strain that makes a woman tired before the day is over. Maybe you think you can't take time to rest—if you will use Hewitt's Easy Task Soap in the kitchen and laundry you'll have plenty of time. It does half the work itself and doesn't eat into the clothes like many common soaps do. Just say Easy Task to your grocer—he'll know.

HEART AND HOME TALKS BY BARBARA BOYD

A Christmas Gift That Can Be Made Now.

It is none too early to look ahead to Christmas, especially as certain things can be made now which cannot be made later. To the busy housewife, with the home to be made ready for winter, new clothes to be bought, and the children furnished forth for school, it may seem impossible to think of Christmas. But the house will not suffer seriously by waiting a few days more for its winter rugs and draperies, while these few days at this season may be made to yield some delightful gifts for the holidays, really not so very far away.

The woman who has a shut-in on her list, or friends who board or live in apartments, can send few gifts that will be more acceptable than some home-made grape juice or grape jelly or marmalade. And now is the time to make it. It need not take long. Perhaps a day will be sufficient to make enough to supply the friends to whom such a gift will be acceptable.

Home-made quince marmalade or jelly is another delicacy most acceptable to the woman cut off from making these things for herself. But if there is a doubt as to the usefulness of jelly or marmalade, there need be no hesitancy about grape juice. A half dozen or a dozen bottles of this is welcome by almost every one. It takes little space to stow away, is no trouble to serve, and the man or woman would be rare indeed who did not like it.

Delicious grape juice can be made by washing and stemming the grapes, mashing them, straining them first through a fine sieve and then through a jelly bag, and putting the juice into a porcelain-lined kettle to boil. Boil ten minutes, bottle while hot, cork and seal. If it is desired to make the grape juice sweet, after the syrup has boiled ten minutes, add sugar in the proportion of half a pound to a pint of juice.

It is not much trouble, you see, to make grape juice, and no matter how busy the housewife may be, she will find it will pay her to squeeze in a little time to prepare such a gift. And when the holiday season comes with its crowded days, she will be very glad that she can cross off various names on her list as already supplied. For as every woman knows, though she may think she is busy now, it is as nothing to the pace she is compelled to strike around Christmas time. So aside from the fact that now is the only time when such gifts can be prepared, their preparation now will be a decided relief when the busy holiday season is here. So, carefully study the coming week's program, and see if there is not a day in it when you can set aside the duties planned, and in their place make these holiday gifts for such on your list as will rejoice at their arrival.

Danderine

Makes your hair grow long, heavy and luxuriant and we can prove it

Get a 25 Cent Bottle Now and Forever Stop Falling Hair, Itching Scalp and Dandruff

Hair Becomes Soft, Fluffy, Lustrous and Abundant After a Danderine Hair Cleanse

Danderine is to the hair what fresh showers of rain and sunshine are to vegetation. It goes right to the roots, invigorates and strengthens them. Its exhilarating, stimulating and life-producing properties cause the hair to grow abundantly long, strong and beautiful. It at once imparts a sparkling brilliancy and velvety softness to the hair, and a few weeks' use will cause new hair to sprout all over the scalp. Use it every day for a short time, after which two or three times a week will be sufficient to complete whatever growth you desire.

Immediately after applying a little Danderine all dandruff will disappear, all itching of the scalp will cease and there will be no more loose or falling hair.

If you wish to double the beauty of your hair in ten minutes surely try this—moisten a cloth with a little Danderine and draw it carefully through your hair, taking one small strand at a time, this will cleanse the hair of dust, dirt or any excessive oil. In a few moments your hair will be wavy, fluffy and abundant and possess an incomparable softness, lustre and luxuriance, the beauty and shimmer of true hair health.

If you care for beautiful, soft hair and lots of it surely get a 25 cent bottle of Knowlton's Danderine from any drug store or toilet counter—A real surprise awaits you.

BLACK VELVET AND WHITE LACE FOR THEATRE HATS.

Black velvet is not going to yield an atom of its popularity just because it has enjoyed unprecedented vogue for so many months, but as laces are well to the fore, the two widely different materials are being attractively combined and especially in the case of autumn hats for theatre and restaurant service. The one pictured is constructed over a wire frame and has an almost transparent brim finished at the under side only with a puff of velvet, at the left side of the velvet crown is a tree egrette of ostrich spirals.

ed upon as far as can be learned, it is sure that there will be something doing in a short time.

Recipes for Sept. 29, 1911.

Red Cabbage, German style—Shave a medium sized, very firm head of cabbage, in a large saucepan put two tablespoonfuls of butter, one scant tablespoonful of sugar, a half cupful of vinegar, six cloves tied in a bit of thin muslin, one teaspoonful of salt and one-quarter of a teaspoonful of black pepper. When just boiling, add the cabbage, cover closely, and cook until tender, which will take about an hour.

Red Pepper Salad—This salad needs one or two sweet red peppers. These are halved, divested of seeds and white veins, and with a sharp knife cut into the thinnest strips. Some blanched lettuce leaves are arranged in the salad dish, the peppers sprinkled over them, and a French dressing over all.

235 CRIMINAL CASES PENDING IN LOCAL COURT

HEAVIEST CRIMINAL DOCKET IN HISTORY OF LICKING COUNTY COURTS.

Fourteen Cases of First Degree Murder Still Pending, of Which 11 Are Results of Lynching.

In all the history of Licking county, the criminal docket of the common pleas court has never been as heavy as it is at the present time. There are now pending for trial 235 criminal cases, among them being 105 cases for alleged violation of the Rose law, while there are also a number of indictments for drunkenness and profanity.

There are 14 cases wherein first degree murder is charged, in addition to the cases already disposed of. Of the cases growing out of the lynching about 35 have been disposed of. Half of this number were charged with murder in the first degree and others for a lesser degree of crime.

The following named persons, indicted for first degree murder, yet remain to be tried: Frank Graef (out on bond), Levi Valentine, Chas. Wilson and Edgar Owens (out on bond), Walter Diehl, S. A. Holler (at large), Amos Reed, Thomas Valentine, Edward Woolard, James Marlowe, Cleveland Priest and Perry Davis.

Don Moreland will be tried on the charge of killing a young girl near Pataskala about a year ago.

Regarding the other cases, they are nearly all for different offenses. It is quite probable that another judge will be secured to try the cases still pending, which grew out of the trouble on the night of July 8, 1910.

Assistant Attorney General Wm. Miller of Columbus was here several days ago, endeavoring to secure an acceptable judge to try the cases. While nothing has been fully decid-

FRESHMEN WIN OVER SOPHOMORES AT OLD DENISON

Granville, O., Sept. 28.—In order to settle the class supremacy between the Sophomore and Freshman classes at Denison University, it was decided to have a flag rush, a tug of war and a football game. The events were scheduled for Thursday and Friday, and early Thursday morning there were things doing on Beaver Field, getting ready for the events.

In the flag rush the Freshmen won in one hour and twenty minutes, when they succeeded in getting down the flag, which was made of boiler plate iron, riveted to the pole. In the preliminary rush it took the Freshmen 30 minutes to capture and rope the Sophomores.

STRAY BULLET FROM GUN STRUCK DR. U. K. ESSINGTON

While Dr. U. K. Essington was leaving Hanover last Saturday in his auto, a shot from a Flobert rifle struck him in the back, inflicting a slight wound. It was learned that Herbert Scott, a young boy, had done the shooting and Probation Officer Sheridan went down to Hanover, saw the boy and ordered him to report to Juvenile Court Friday morning at 9 o'clock. The boy claims that he was shooting at birds.

MILLION IN PRESENTS AT GATES WEDDING

Uniontown, Pa., Sept. 28.—An estimated million in wedding presents was the matrimonial bounty showered on Charles G. Gates, son of the late financier, and Miss Florence Hopwood of Uniontown, who were married here last night.

Although the recent death of the groom's father called for a simple service, as carried out, the brilliancy of the event was marked. Probably an even 100 guests, mostly from the west, though many were from New York City, witnessed the ceremony, which was performed at the home of the bride's parents on the rich Hopwood country estate, back among the Allegheny Mountains. The officiating clergyman was Rev. J. P. La Grone of Port Arthur, Tex.

The bridesmaid was Miss Margaret Clemens of St. Charles, Minn., and the best man was Wayne Dogue of Detroit.

Mrs. John W. Gates, mother of the groom, who came here in her special car, was the first to congratulate the bride. Among western guests in attendance was O. C. Wells, who was a business partner of the late John W. Gates.

The groom's gift to the bride consisted of diamond earrings, a pearl and diamond necklace, two diamond rings and a diamond brooch. The gift of Mrs. John W. Gates to the bride consisted of a diamond collar, a chest of silver, an imported tea service and another chest of miscellaneous silver.

Guests from far and wide showered the happy pair with other rich tokens, and it would take several

compartments on the private car of the couple to convey the silverware alone.

Fifteen suites of the Titlow Hotel in Uniontown last night housed most of the guests at the wedding. There was no reception following the event, owing to the fact that Mrs. John W. Gates is still in mourning for the death of her husband.

The wedding supper was served at the home of the bride's parents, Mr. and Mrs. Robert Hopwood.

Immediately after the ceremony, Mr. and Mrs. Gates left Uniontown in their private car for an extensive tour of the United States. He and his bride will forego their European tour indefinitely.

Mrs. John W. Gates arrived here in her private car, Bright Star. Minneapolis and St. Paul guests came in private cars, and the bride and groom also had their private car. On arrival here Mrs. Gates kissed her son and the bride-to-be, and, turning to the minister, Rev. Dr. La Grone, she remarked:

"I'm so happy I could kiss you, too!"

With that she raised her veil and kissed the clergyman on the cheek. The elder Mrs. Gates left here today.

PRESIDENTIAL PROGRESSION

(Philadelphia Record)

Greatly impressed by the cordial re-
ception of the Progressives and Dem-
ocrats of Kansas, President Taft has
promised to sign a bill to reduce the
brutal schedule of woolsens when his
Tariff Board shall make a report rec-
ommending a reduction of duties. It
is a pity that he put his veto on the
moderate Wool bill, instead of waiting
till next year for reports of his board.
But at this rate of progression he may
be expected to declare that he will
approve of the Free Food bill when he
gets into Progressive Iowa, and of a
bill to reduce the exorbitant cotton
schedule when in Progressive Minne-
sota.

The President, however, is doing
himself a wrong in repeating the ob-
solescent jargon of the Republican plat-
form about adjusting the tariff in ac-
cordance with "the difference of cost
of production at home and abroad,
with reasonable profits to producers."
No tariff has been or can be estab-
lished on so slippery a basis. When
the Tariff Board reports that textile
fabrics, structural steel and many
other manufactures cost less abroad
than at home, that will be a substan-
tial reason for reducing the protec-
tive duties to a revenue standard for
the benefit of American consumers
and of the public treasury. This is
the only reasonable basis on which the
Payne-Aldrich tariff can be adjusted,
and the only basis on which the Dem-
ocrats in Congress will legislate. When
commodities cost more or as much
abroad as at home it does not matter
what duties are imposed on them, as
none will be imported at the expense
of the importer. Is it not time now
to have done with this platform cant
about making a tariff on, differences
in cost of production?

COURT NEWS

Common Pleas Court.

The case of the City of Newark
vs. Newark Natural Gas & Fuel Co.,
was submitted to the court on a de-
murrer to the second and third de-
fenses in the amended answer, the
claim being made that they do not
state a defense to the plaintiff's
claim in the petition. The court over-
ruled the demurrer. This is a suit
brought to obtain an injunction to
restrain the rate for gas in Newark.
State of Ohio vs. Frank Your,
indicted for profane swearing and
being in a state of intoxication. Bond
fixed at \$100.

E. Propser vs. Geo. Fessler et al.,
a creditor's bill. Judgment of dis-
missal, the same question being in-
volved as in the case of John W.
Brown et al. vs. George Fessler, and
which latter case is for trial Friday.
C. S. Hammond vs. G. W. Craw-
ford, motion to require plaintiff to
give security for costs sustained.
Plaintiff is a non-resident of the
county. Security ordered to be given
within 20 days or cause will be
dismissed. Plaintiff brings the suit
to recover damages on an alleged
breach of a contract for the sale of
horses.

B. & O. R. R. Co. vs. Wm. Linko,
leave given to file amended petition.

Reply of Defendants.

In the case of Harvey N. Smith
and others against Nathan C. Flem-
ing and others, the defendants have
filed the reply to the reply of the
plaintiff, in which they deny all the
allegations contained in the reply
not before denied. They ask that
the reply of the plaintiff be dismis-
sed and that they go hence with
their costs and for all further re-
lief. J. V. Hilliard, attorney for
defendants.

Motion Filed.

In the case of Frank P. Radford
and others vs. George W. Crawford,
the defendant has filed a motion to
strike from the files the amended pe-
tition for the reason that it does
not conform to the former order of
the court. Should the motion be over-
ruled, then saving and reserving
his exception, the defendant moves
the court to require the plaintiffs to
make their petition more definite
and certain. Fitzgibbon & Montgom-
ery, attorneys for defendant.

THE MODERN HEAD DRESS

Causes Baldness — We Cannot
Change the Head Dress, But We
Can Prevent Baldness.

Up to the time we began to civilize
him a bald headed Indian was a thing
unknown. Wearing nothing on his
head except the covering furnished by
nature and being a stranger to the
use of a hair brush, especially the pub-
lic one, the scalp and hair had plenty
of ventilation, much sunlight and,
hence, a condition favorable to a luxu-
riant growth of hair existed at all
times.

It was the adoption of air and light
excluding head gears and artificial
head decorations generally, together
with the occasional use of a commu-
nity hair brush, which gave the dan-
deruff germ its opportunity. Since this
parasite has multiplied to an alarming
degree until now there is hardly a
person who is not troubled more or
less with dandruff and falling hair.

Many, to be sure, have passed the
worrying stage. Having become
chronically bald they realize that
nothing is capable of producing nat-
ural hair for them. Let these be a
warning to all who are experiencing
the significant annoyance of dandruff
and falling hair.

Dandruff, which is due to a germ,
and falling hair can both be overcome
by the regular use of Newbro's Herp-
icide.

This wonderful scalp remedy kills
the vicious germ which causes dan-
deruff, cleanses the scalp and stops the
hair from coming out. The destruction
of the germ permits the hair to grow
naturally and luxuriantly as nature
intends.

Herpicide makes the hair bright,
snappy, light and fluffy.
One dollar size bottles guaranteed.

DEMOCRATIC LEADERS

(Continued from Page 1.)

machinery, might insist upon it as a
quid pro quo for summoning the ses-
sion.

There are intimations that there
may be some changes made in the
law relating to the State Board of
Administration, which statute was cut
and twisted during the fight that pre-
ceded its enactment.

It developed during the stay of the
committee that the real reason that
Governor Harmon has made no state-
ment concerning the possibility of a
special session is that the supporters
of the movement have as yet been
unable to give him any assurances as
to the willingness of the General As-
sembly to pass such a measure as con-
templated or to limit the expenditures.
The matters will be answered cate-
gorically as soon as special commis-
sioners can make their report to the
main commission.

Speaking for the conference, Con-
gressman Goeke made the following
statement:

"For some time the national leaders
of the Democratic party have been
urging this change, and the leaders
of the party in the state have sought
to ascertain the sentiment of the
Democrats of the state, and have as-
certained that it is the general opin-
ion, that in view of the fact that Con-
gress has increased the number of
districts in the state from 21 to 22
since the adjournment of the legisla-
ture, and that the present division was
made some 20 years ago on an out-
rageously partisan basis, assuring in
normal elections 19 Republican mem-
bers of congress and two Democratic
members, that a special session of the
Legislature be called in the near fu-
ture.

"The chairman of the Federal Rela-
tions committee and Messrs. Finley
and Moore are to figure out a plan of
redistricting the congressional dis-
tricts that will be eminently fair to
both dominant parties. No attempt
will be made to gerrymander the state
on partisan lines.

"The committee in charge will prob-
ably submit a plan providing for an
equal number of districts, or as nearly
so as practicable. When the plan has
been agreed upon the same is to be
submitted for consideration to the
Federal Relations Committee of the
Senate and House and then to the
Democratic members of the Legisla-
ture, and if it meets with universal
approval such fact will be made
known to the Governor and a program
will likely be suggested as to what
other things are necessary to be taken
up by the Legislature and disposed of
in the special session.

"It is generally conceded that there
are a few other important matters of
general legislation that will have to be
taken up by the special session which
could render the calling of the same
necessary irrespective of the redistrict-
ing bill."

and I tell you, William Henry, that such painting doesn't pay. I am
in the sore and yellow, and my life's not worth a darn; I am working
as the butler of a fourth rate livery barn; I am everybody's ser-
vant, but for everybody's good; even the mules reach out and
kick me when they see me standing near. I might own this blooming
village—this is truth without a faint—if I only had the money I have
blown for crimson paint. I might ride in chug-chug wagons, I might
cut all kinds of dash, if those scarlet decorations could be realized
in cash. To us poor old worn out codgers memories are running
sore; we are running trifling errands, we are doing childish chores,
taking kicks and jeers and curses for the penalties that they yield,
just to keep our bones together till we land in Porter's Field, and
our thoughts of youthful folly make us sick at heart and faint—
we might live in peace and honor but for ventures in red paint!

RECIPROCITY IN NEXT CAMPAIGN

Politicians Undecided About Ef-
fect of Failure.

CAUSE OF LAURIER'S DEFEAT.

National Feeling He Built Up Had
Much to Do With Rejection of Uncle
Sam's Trade Offer—Church Influence
Was Also of Importance In Con-
trolling Votes.

By ARTHUR W. DUNN.

Washington, Sept. 28.—[Special.]—
Politicians cannot yet decide what will
be the effect of the campaign next
year of the failure of Canadian recip-
rocity. About the only tangible thing
which the people have been able to
grasp is that the tariff must affect the
high cost of living by reason of the
increased price of foodstuffs since the
agreement was rejected in Canada.
This will mean a greater clamor than
ever for a reduction of the tariff. In-
stead of taking up reductions with any
one country it is now possible that re-
ductions will be with the whole world.
At least that will be the Democratic
plan and will be attempted as soon as
congress reconvenes in December.

Much Misinformation.

Comments on the action of the Can-
adian electorate show how much mis-
information has been accumulated in
this country upon the condition and
feelings of the people of Canada. In
the first place Sir Wilfrid Laurier has
built up that very national feeling
which came to the front and over-
threw his government. I heard him
say to a group of Americans and Cana-
dians at Ottawa that "the nineteenth
century was to the United States what
the twentieth century would be to
Canada" that Canada within itself was
"to build up a great empire beside the
United States and almost equal to the
republic in grandeur." That idea he
has been inculcating for many years.
There is a wonderful national spirit in
Canada.

Church Influence.

Nearly everybody seems to have
overlooked the church influence. Six
weeks ago I pointed out in this cor-
respondence that one of the most
potent factors of opposition to the re-
ciprocally agreement in Canada was the
fear of Catholics of ultimate annexa-
tion. In Canada the Catholics have
separate schools and share in the public
school funds. They also have other
concessions which would not be allow-
ed in this country. They know that
annexation to the United States would
take away these privileges. This was
a silent but very important factor in
determining the result. Those who
know the condition are aware that the
annexation cry caused more church
votes to be cast against reciprocity
than any other reason.

Like Their Own Government.

After having visited nearly every
portion of Canada from Montreal west,
I came to the conclusion that Cana-
dians like their form of government.
Americans who had settled in the
northwestern provinces told me that
they preferred the Canadian form of
government better than they did our
form. The government responds quick-
ly to the demand of the people. That
is true in the provinces as in the gen-
eral government. Most of the people
are proud to be called citizens of the
Great Britain. That is what the
American immigrant calls himself at
first, but gradually he is proud to say
he is a British subject. The native
Canadians and immigrants from other
countries take pride in the latter title.

Two States For Clark.

Unless all signs fail Kentucky and
Tennessee are lining up for Champ
Clark for president. Senator Taylor
would not have taken the pronounced
and aggressive ground for the speaker
if there had not been a sentiment to
back him up. Congressman Stanley
says that Kentucky will be for Clark,
not only because he stands well before
the people, but because Kentucky is
proud of him as a native son.

High Prices Abroad.

Reports from consular officers in
Europe and Asia show that the
drought has been severe and crops
have suffered. It means high prices
abroad and consequently increased
prices in this country, for prices of
foodstuffs are very generally governed
by the world's supply.

Santo Domingo Prosperous.

A great many people had misgivings
about the altruistic move of this gov-
ernment in taking charge of the
finances of Santo Domingo and general
supervision of that government. The
prosperity of the Dominican republic
has been a shining example of what
will happen in such countries when
there are stable governments.

Confident In West Virginia.

Every Republican who comes to
Washington from West Virginia talks
with great confidence about the abili-
ty of the Republicans of that state to
regain control in the coming election.
West Virginia went from two Repub-
lican senators and five Republican
congressmen to two Democratic con-
gressmen and four Democratic congres-
sors as a result of the elections of
1910. The Republican politicians boast
that they will regain the four lost dis-
tricts and one senator. It will be five
years before they have a chance at
one of the senatorial seats.

DEFENSELESS MAN

By JANE PINCKNEY BENNETT

Copyright by American Press Asso-
ciation, 1911.

The happiest day in my life was
when Alan Constable proposed to me.
I had been expecting a declaration for
weeks, and perhaps this added to my
delight. Alan is a steady, slow going
fellow, who never does anything in a
hurry.

There is a girl in this town who was
once engaged to Alan. I met her at
Carrie Watson's last week. Her name
is Wentworth—Kate Wentworth—and
from all appearances she must be a
lovely girl. At any rate, Kate says she
is. It must have been embarrassing
for Miss Wentworth to meet me,
knowing that I was engaged to the
man who was once her lover, but she
didn't show it. Kate says she has got
all over that affair long ago. She said
something else I didn't like—that Kate
wouldn't marry Alan now if he were
worth ten millions.

I haven't been able to sleep nights
since I heard that Kate Wentworth
wouldn't marry Alan if she could.
I spoke to Alan about his old
dame, and he said that he didn't care
to discuss the matter. I wonder why.
There certainly can't be anything
about it that he's ashamed of. Yet
what Carrie said about it troubles
me. That a girl formerly betrothed
to the man one is to marry wouldn't
marry him if he had \$10,000,000 is
not a pleasant thing for his present
fiancee to hear. Suppose he has some
weak or bad spot in him that she hap-
pened to find out. Pshaw! I resolve
solemnly that I'll think no more about
it.

I went to call on Carrie the other
day and asked her what she meant
by saying that Kate Wentworth
wouldn't marry Alan now. Kate said
she didn't know. When I urged her
to tell me something about it she said
she never mixed herself up in other
people's affairs. So I let the matter
drop. Just as I was about to leave
her she said that out of pure friend-
ship for me she would tell me some-
thing she thought I should know.
Then she told me that Kate had bro-
ken off her engagement with Alan be-
cause he had treated her shamefully.
I asked what the shameful treatment
had consisted in, to which she replied
that there were so many things that
she didn't care to name them, and
Kate wouldn't care to have her do so.

My engagement with Alan is broken.
I just couldn't drive out of my
head what Carrie had told me about
his treatment of Kate Wentworth. At
last I told him about it. Instead of
hurling back the accusation like a
man, he didn't even deny it. All he
said was that I had nothing to do
with his previous affairs of the heart
nor he with mine. That's all he would
say about it. Then I told him that if
such things were not cleared up be-
fore marriage they would be a thorn
in our sides after marriage, and so
long as he wouldn't give me any sat-
isfaction in the matter we had better
call our engagement off. To this he
agreed. I gave him back my beauti-
ful ring. And oh, how I did hate to
part with it! I'm very miserable.

Oh, my goodness gracious! I surely
shall have nervous prostration. Some-
thing awful has happened. The en-
gagement between Alan Constable—my
Alan—and Carrie Watson is out. But
this isn't all. I've been told by Grace
Fuller, Carrie's most intimate friend
and one of my own, too, that Carrie
is wearing the engagement ring which
Alan gave me and which I returned to
him. To think that Carrie—the ser-
pent—should have told me all those
things about Kate Wentworth and
Alan, breaking my match with him,
then accepting him herself. I do be-
lieve she told them to me purposely to
part us so that she could get him. Oh,
my dear stars! I think I shall go mad.

It is three months since I heard that
Alan was engaged to Carrie Watson.
Today I have received a note from him
saying that his engagement with Car-
rie lasted only a week and he had only
brought it about to show me how silly
I was to listen to tales about him. He
denies that he ever was engaged to
Kate Wentworth. He sent with his
note the engagement ring and asked me
to accept it as a friendly gift, saying
that he has no fault to find with me.
I was simply caught in a trap by an
unscrupulous woman. He closed by
saying that the incident had preju-
diced him against marriage and he had
decided to stick to his club.

I thought a long while before decid-
ing to accept the ring as a "friendly
gift" but finally decided to do so. I
alone was at fault. My brother, whom
I have told all about the trouble, says
that a man attacked by a woman is
practically defenseless and when I
was told that he had treated a former
fiancee badly I should not have expect-
ed him to avenge her or her friend of
falsehood. This is a man's view of it.
I can't see any harm in one who is
maligned by a woman defending him-
self. To this my brother says that
there may be no harm in it, but a thor-
oughbred will never do it, and if he
does it won't do any good. I don't
understand this, but I know that Car-
rie Watson has separated me from the
man I love and will always love.

Thirty years later. Neither Alan
Constable nor I have ever married.

"The Great Unknown."

For thirteen years the author of
"Waverley" was unknown. Indeed, the
country spoke of him as "the great
unknown," a pseudonym Sir Walter
Scott often employed in writing. But
on Feb. 23, 1827, Sir Walter gave a
dinner party to which, among others,
Lord Meadowbank, the judicial mag-
nate, who chanced to know his host's
secret, was invited. Then when the
toasts were being drunk Meadowbank,
with Scott's permission, got up and
proposed the health of "the great un-
known, Sir Walter Scott." The effect
was magical, and the news spread
through the country like wildfire. That
dinner and the secret it disclosed were
the most talked of events of the year.

SHOULD KEEP CHILDREN IN THE SCHOOLS

Granville Institutions Well Attended
—News of the Thriving Little College City.

Granville, Sept. 28.—While our public schools are largely attended, there are still a number of youth of school age who are not in the schools. There are too many who leave school before they have attended them more than a few years, and in a very large proportion of cases they do so not because it is necessary for them to, but for some trivial reason that should not be allowed to influence the matter. Some are taken from school by their parents as soon as they reach the age when attendance is no longer compulsory so that they may help support the family. In other cases the children themselves are allowed to decide whether they will continue in school or not, and very naturally many of them, either disliking the restraint of the schools, or anxious to earn a little money for themselves, conclude that they have education enough. Most of them will bitterly regret this afterward. This matter ought to have far more serious thought on the part of parents than it receives in a number of cases.

So many farmers throughout the county, and in the vicinity of Granville especially, are giving notice prohibiting hunting on their property that very little free territory is left for sportsmen to go gunning. Farmers are coming to regard game animals, and especially birds, a valuable asset and protect them.

Mr. and Mrs. Langley DeMuth, formerly well known residents of Licking county, but who have been making their home in Nebraska for the past twenty years, have been visiting old time friends in Granville and vicinity during the past week. They will leave for Chicago on Saturday, where they will make a short visit with their son, Henry DeMuth, before returning home.

The Granville Athletic team is very anxious to have a ball game with any Newark team. Athletes or Independents preferred, on Sunday afternoon, the game to be played on the Athletic grounds, just east of Granville.

Mr. and Mrs. Lawrence Woods of Springfield, O., who have been visiting relatives and friends here for a few days, returned home Wednesday night.

Mr. Ellis P. Lebler, a rising young attorney of Dayton, is making a short visit with friends in the village. Mr. Lebler is a graduate of Denison University, having graduated with the class of '97.

Owing to the illness of Miss Alleyne Callahan, Miss Altje Cook is teaching the third and fourth grade of the public schools.

Miss Jennie Richards, who lives a short distance north of the village, left Thursday morning for Pittsburgh, where she will make a short visit with her uncle, Mr. Thomas Richards.

Mrs. T. J. Roscoe of Columbus visited Granville friends and relatives this week.

Miss Elinore Perkins made a short visit with her parents in Delaware.

Martin Bricker, who had several ribs broken a few weeks ago by a team of horses crushing him between the wagon bed and a barn door, is able to be at work again.

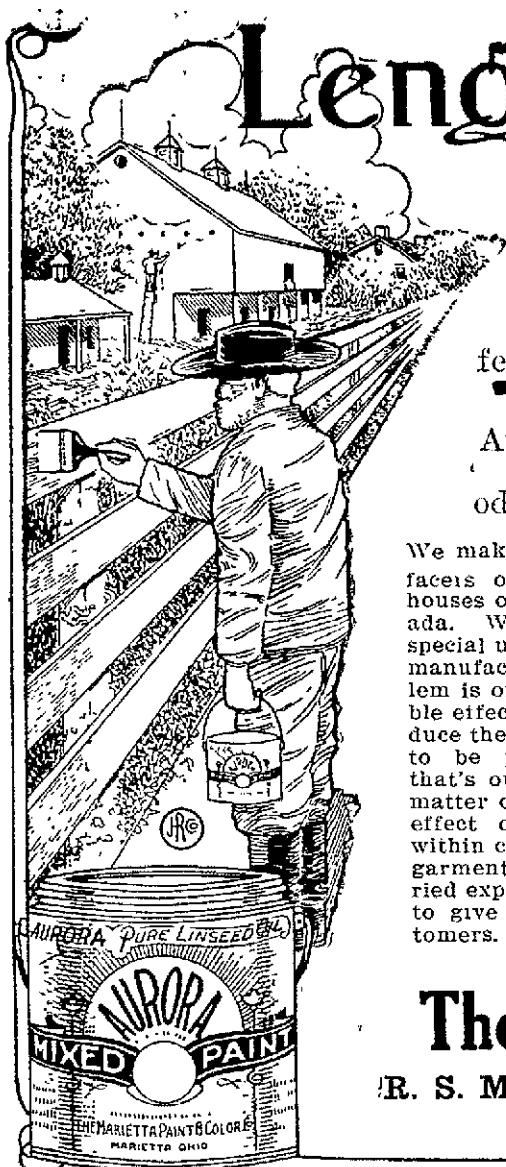

SOFT VELVETY COMPLEXIONS OF SOUTHERN WOMEN

The beautiful, soft, velvety complexions of the Southern women are not due to paints and cosmetics, says Marion Harlow, in her "Hints to Beauty Seekers."

These women use plenty of good pure soap and water, and after bathing they massage the face, arms and neck with a lotion made by dissolving two ounces of amaroil in a pint of hot water, to which has been added two teaspoonfuls of glycerine.

Paint, Powders and Cosmetics clog up the pores and are injurious, while this amaroil solution keeps the pores open and in a healthy condition, allowing the fresh air to enter the body through the pores; from a healthy standpoint, not to say anything about the improvement it will make in your complexion, I would advise every woman to try this simple lotion. Simply get two ounces of amaroil (in the original 2-ounce package) from your druggist, put two teaspoonfuls of glycerine into a pint of hot water and add the amaroil. Shake well, let stand for a few hours, and then it is ready for use.

Lengthens the life of farm buildings

When we say Aurora Paint is superior for farm buildings, fences, etc., we mean more.

We claim that for any work intended to endure the weather, Aurora is the supreme paint.

It owes its quality partly to the ingredients, partly to the method of mixing; but mainly to the know how. We are wood finish specialists

We make the stains, fillers and surfacers of all the leading furniture houses of the United States and Canada. We make paints to order for special uses; solve paint problems for manufacturers. Sometimes the problem is one of producing a fine, durable effect, regardless of cost; we produce the paint affinity for the surface to be preserved and beautified—that's our forte. Other times it's a matter of economy; getting a certain effect on a manufactured article within certain cost limits; we cut the garment to suit the cloth. Our varied experience in this line enables us to give valuable service to our customers.

Aurora Mixed Paint appeals to the painter. It is practical. There's a certain feel about it quickly recognized by the experienced painter. To him it indicates just the proper amount of lead and pure linseed oil, reinforced with the correct scientific mixture of inert pigments.

You will like Aurora Paint. It spreads right, looks right and puts up the best fight against the elements of any paint made.

AMUSEMENTS

WHAT THE PRESS AGENT SAYS

The Tenderfoot.
"The Tenderfoot," a western melodrama of the new school, which will be presented by the Bal Stock during the engagement at the Auditorium, is one of the cleverest stories, cleverly told, that has been heard on the modern stage.

Laid on the borderland of Mexico and the United States and dealing with incidents as reasonable as they are human, "The Tenderfoot" has been claiming unusual attention on the part of theatre-goers because of the many incidents in the play similar to actual occurrences on the war-ridden boundary line.

The play teems with action and breathes the very atmosphere of the cactus-covered plains and the many colored hacienda of Arizona and Mexico.

Special scenery and correct costuming, added to a plot that entails swift action and splendid climaxes, makes the production one of the best in the repertory of the company.

The Fortune Hunter.
A young man "once rich finds himself poor. He tries work and fails. His employer discharges him. He is proficient at cocktails and cigarettes, a failure, apparently, at everything else. He is ashamed to ask

Scene from "The Fortune Hunter."

further help from friends and reluctantly makes up his mind to turn fortune hunter and marry a rich girl. His friend says to him: "Move to a little, dull town. Dress very plainly and very elegantly. Don't drink, don't smoke, don't swear. Go to church. Board with

an old widow if you can find one. Have serious books and a large Bible where every one can see them on the table. Don't laugh, don't smile. Don't pay any attention to young women. Get a job, work hard. In every little town there is at least one girl worth a million. You will marry her. I don't ask you to propose to her for her money—that would be dishonourable. She'll propose to you, then you accept her and you marry her and give me back the \$500 that I am going to lend you and \$1000 besides.

That is the beginning of the play, "The Fortune Hunter," which Cohau & Harris will present at the Auditorium Saturday, Sept. 30, matinee and night. The advice of the friend who lends the \$500 works perfectly. The richest girl in the town asks the young fortune hunter to marry her, but the play has no such sordid end. The young man finds that hard work alone can make life worth while, and he finds a simple, earnest girl, with no money, is a great deal better than money or anything else. This is a wholesome play, amusing, pleasing in its sentiment, and thoroughly moral.

Orpheum.
A new show opened at the Orpheum this afternoon. As a special feature the Five Burns Sisters offer their harmony singing and playing act, giving some popular vocal work in solos and quartettes, and playing the piano and various members of the violin family. The act is refined and high class in every way. Court & Don, the "Scotch Highballs," are a team of real comedians, who will keep you roaring. Harry Rose, who sings and whistles, has a new line of songs given in a high pitch. His whistling and imitations are very pleasing.

For the children, Jack Davis presents his modernized Punch and Judy. The little wooden creatures are furnished with a miniature stage and give a pleasing entertainment. The Orpheumscope has a new picture.

MIKE'S HORSE CAUSES HIM MUCH TROUBLE

Mike Vettish, a foreigner, was before Mayor Ankele Thursday morning on complaint of Mrs. Moore of Wilson street, charged with allowing his horse to run at large. This action on the part of Mike resulted in the destruction of a small quantity of corn which was standing in a field west of the creek.

This is Mike's second offense of this nature, and the first time he was warned to keep the animal confined. It developed in the course of the mayor's inquiry that Mrs. Moore's corn patch was well fenced, but a neighbor woman persists in leaving the gate open and the horse is given free access to the ripening corn.

Wednesday evening the animal succeeded in tramping down a quantity of corn and eating considerable. For this Mrs. Moore claimed her loss was \$5, and insisted that Mike pay this amount.

Mike protested that this claim for damage was excessive. He said that the horse ate but a small quantity of corn and that only a small portion of the field was invaded by the animal.

Mayor Ankele suggested that a board of appraisers look over the field and fix the amount of damage, provided Mike would pay the appraisers for their work, abide by their decision and settle the damage.

This was satisfactory to Mike and the quartet was taken to the corn field in the patrol wagon, where the appraisers looked over the field and decided that Mrs. Moore's claim was excessive. Their report to the mayor was that 50 cents would cover the loss of corn eaten and destroyed by the horse.

Mayor Ankele ordered this amount paid to Mrs. Moore and fined Mike \$5 and costs for allowing his horse to run at large. The fine and costs, together with the damage to the corn crop and the sum paid the appraisers, amounted to \$12.50.

"The horse isn't worth \$12," said Mike, as he paid a part of the amount to Mayor Ankele. "I guess I'll have him shot."

It was learned further that Mrs. Moore caught and tied a mule belonging to another neighbor because the animal invaded the corn field, and that the neighbor had never called for the mule. Mrs. Moore now faces the dilemma of having to feed an animal she does not own, using her own feed, without being able to sell the animal for damages. Its value is not sufficient to warrant a civil action for damages, and she can't sell it without resorting to law to settle the title to the beast.

Mrs. Moore planted two lots in garden truck early in the spring and has had to fight almost continually to safeguard her growing crops. Early in the season, when the corn was just shooting up above the ground, the horse belonging to Vettish invaded the field and nipped shoots. Mrs. Moore had to replant the biggest portion of the field. For this Vettish paid Mrs. Moore \$2.50 to cover the cost of replanting, etc.

WILL TEACH HOG RAISING ON SPECIAL TRAIN

Columbus, Sept. 28. — Under the auspices of the College of Agriculture of Ohio State University, a special train to teach hog raising will be run over the Hooking Valley railroad from Oct. 23 to 27. Live hogs will be carried on the train for purposes of demonstration.

This is the first time that instruction in raising of hogs has been given by the agricultural train method. Lecturers on swine will be Professors C. S. Plumb and H. E. Evans. Other subjects discussed will be horticulture and soil improvement, with Professors O. M. Johnson, V. H. Davis, J. H. Gourley and M. A. Bachtel as instructors.

Young people are not to be overlooked on the "hog special," as it has been called. There will be one coach for school children and Professors A. B. Graham, C. R. Titlow and O. M. Kile will give agricultural talks for young people. Stops of an hour and a half will be made.

Monday, Oct. 23, the train will leave LeMayne and conclude the day at Carey. Tuesday the first stop will be at Upper Sandusky and the last one at Delaware. Wednesday's meetings will be at Hyatts, Powell, Linworth, Groveport, Canal Winchester and Lancaster. Thursday's stops will include Carroll and Logan, with the night stop at McArthur. Vinton will be the first stop Friday morning and the trip will close at Middleport.

NOTICE FROM BOARD OF REVIEW

To All Depositors in Banks:

We again, as a Board of Review of the City of Newark, appeal to you to call at our office in the basement of the court house and return to us the several amounts you had on deposit in said institutions on April 9, 1911. Remember your neighbors who have real estate and no money are taxed on said property at its true value in money. You have the benefits of the public schools, the fire department, the safety department and every other right which a city government guarantees to all its citizens. Then from every sense of honor and justice, both to yourself and your neighbor, you ought to cheerfully list your moneys for taxation. The Smith one per cent law was passed largely for your benefit. Under the old rule of former years, if you returned the same for taxation, you would have been compelled to pay as high as \$3.60 on the hundred dollars valuation. Now with corporations and every other class of tangible property on the tax duplicate at their true value in money, you are absolutely guaranteed a very low rate of taxation and it is now only fair that you ought to list your money and help support the government under which you live and on which you rely for protection in all your rights in common with all our citizens. It will be the consistent policy of this board next year and thereafter to reach this class of property and if found and penalties added, do not blame us, for we have given you the law.

Daddy's Bedtime Story

The King Who Turned Things Into Gold

THE children's bedtime treat had been a bunch of big purple grapes for each of them. Jack and Evelyn were fond of grapes.

"They look like frosted amethysts," said Evelyn. Her mother had a purple stone in a ring, and Evelyn had learned that it was called an amethyst.

"I wish they were," said Jack longingly. "Then we could take them out and sell them to buy heaps of things."

"I'm going to pretend I just touch mine and they turn into amethysts," said Evelyn.

"I wonder if you would not get tired of turning grapes into amethysts if you really had that gift?" spoke daddy. "Once upon a time there was a king—do you want to hear about him?"

"Yes, indeed we do," replied the children.

"Well, this king's name was Midas. Having pleased one of the gods of his country, he was told that any wish which he would then make would come true.

"So King Midas said he would wish to have the power of turning everything he touched into gold.

"The god of whom he asked this gift smiled very sadly as he said, 'Your wish is granted.'

"King Midas began by picking a twig off a tree. Sure enough, it turned into gold in his hand. He picked up a stone, and in an instant it was gold. Then he tried a piece of earth, and in a trice it was gold dust.

"Then he went into his palace and ordered a great feast.

"King Midas was hungry, and when he lifted a grape to his lips it changed to gold. Then he tried a piece of bread. It hardened into gold in his lips. He drank wine, but it turned into gold in his mouth.

"Then in horror King Midas rose from the table and lifted his hands in frantic prayer to the god.

"Again the god came to him. 'Take back your gift,' begged the king, 'or I shall die of hunger.'

"Then the god said: 'Go, oh Midas, to the head of the river which I shall name to you and wash well in its waters. So shall you wash away your fault and be again as are other men.'

"King Midas did as he was told. His bath is said to have turned the sands of that river to gold, but never again was King Midas heard to wish to be richer than others."

NO REASON FOR IT.

When Newark Citizens Show the Certain Way Out.

There can be no just reason why any reader of this will continue to suffer the tortures of an aching back, the annoyance of urinary disorders, the dangers of kidney ills when relief is so near at hand and the most positive proof given that they can be cured. Read what a Newark citizen says:

C. E. Walton, 74 South Second street, Newark, O., says: "I can vouch for the merits of Doan's Kidney Pills, as I gave them a thorough test. My kidneys were inactive for years and caused a dull ache across the small of my back. There was much lameness through my loins and the constant standing which my work required, aggravated the trouble. After various remedies had failed to help me, I used Doan's Kidney Pills and they brought such great relief that I heartily endorsed them. I willingly confirm my former statement at this time."

NEWARK YOUNG PEOPLE MARRIED IN COVINGTON

Walter B. Kinney, a popular young B. and O. clerk, and Miss Jessie Mae Smith, daughter of Mr. Cal Smith, a B. and O. conductor, who resides in No. 42 Arcade flats, were married in Covington, Ky., Wednesday morning.

The marriage at Covington was not in the nature of an elopement caused by paternal objections but planned to fool their friends, who had promised them a warm reception when the event occurred.

The young couple arrived in Cincinnati early Wednesday morning, after which they repaired to the manse and lost no time in securing a license of the Rev. G. W. Burton, pastor of the Covington M. E. church, who performed the marriage service, a wedding march being played by a member of the household.

The happy young couple left immediately after the ceremony for the Hotel Sinton where an elegant wedding breakfast was served and later in the day they arrived at Newark, going to the Kinney home where they will reside for the present.

The happy groom is a son of Mr. and Mrs. Clement L. V. Kinney of 561 West Main street. He is one of the city's enthusiastic motor cyclists and has been in the employ of the B. and O. railroad for a number of years. He is a splendid young man and is well liked by all who know him. The bride who fell a victim to Dan Cupid is a charming young lady who numbers her friends by legion and was always a great favorite with all her acquaintances.

The many friends of the newly wedded couple will wish them a long life of health, happiness and prosperity.

FUNERAL OF ORPHINE WELLS.

The funeral of Orphine Wells, who was killed by being struck by an interurban car at the Priest lane, several miles east of the city, Monday evening, was held Thursday morning at 10 o'clock, at the home on Manning street. The interment was made in Cedar Hill cemetery.

No Need To Stop Work.

A MOTHER'S DUTY

It is the duty of every expectant mother to prepare her system for the coming of her little one; to avoid as far as possible the suffering of such occasions, and endeavor to pass through the crisis with her health and strength unimpaired. This she may do through the use of Mother's Friend, a remedy that has been so long in use, and accomplished so much good, that it is in no sense an experiment, but a preparation which always produces the best results. It is for external application and so penetrating in its nature as to thoroughly lubricate every muscle, nerve and tendon involved during the period before baby comes. It aids nature by expanding the skin and tissues, relieves tenderness and soreness, and perfectly prepares the system for natural and safe motherhood. Mother's Friend has been used and endorsed by thousands of mothers, and its use will prove a comfort and a benefit to any woman in need of such a remedy. Mother's Friend is sold at drug stores. Write for free book for expectant mothers, which contains much valuable information.

CAPTAIN WELLS PRESENTED WITH A HANDSOME FOB

Another one of those most enjoyable functions that have been a feature of the old veterans belonging to Encampment No. 31, U. V. L., of this city, for some time past, was held on Wednesday night, when about 20 of the members of the Encampment sprang a surprise on their comrade, Capt. George Wells. The affair had been planned for some time, and Wednesday night Captain Wells was in a manner greeted by his old time friends in a manner that expressed most forcibly the fact that he had many warm friends among the old vets. After greetings had been had all enjoyed a delicious banquet after which Col. Charles Kibler, on behalf of those present presented Captain Wells with a handsome gold watch fob. The Captain, although taken completely by surprise, was equal to the occasion, and responded in the following well chosen words:

Comrades: After listening to the able address by our esteemed Colonel I hardly know how to reply. However, when we look back, it is over fifty years since we offered our services to the government to assist in the war which was destined to be the greatest ever recorded in history, and how well we did our part history tells. Since the close of the war we, as a band of comrades (no difference whether we belonged to the eastern or western army—are like brothers, and will remain as long as any of us survive. There are no other men in the country that are closer to each other than the boys that served from '61 to '65, and now in accepting this beautiful present you, one and all, have my heartfelt thanks, and may you all live to enjoy many more similar occasions.

The surprise on Comrade Wells was the most complete of any yet had and the occasion will linger long in the memory of all who were present.

GOOD HUNTING AND FISHING IN ALASKA

Two Newark Men Having a delightful Time and Enjoying Some Rare Sport.

The following is from a letter written to a friend by U. G. Parks and Charles Barnhart while located at Camp Anita, Wrangell, Alaska.

"We had a very delightful trip arriving in Seattle, Wash., July 8, after stopping off at Chicago and also in the Canada National park at Banff, Alberta. They have an excellent park. Daily trains out of Chicago make the trip as far as Revelstoke in daylight.

"We arrived in Wrangell after a splendid voyage on the Steamer Dolphin, making the inside passage, and were not far from the shore line at any time. The scenery up that passage is almost beyond description; there were great ice glaciers with boiling water coming out from under the mountain of ice.

"The town of Wrangell is a logging and fishing center. They have one of the largest salmon canneries in this part of the country located here. The principal salmon taken in these waters are Cohoes, Sockeyes and King. The latter got very large and have been taken at 75 pounds; the others run from 10 to 25 pounds.

"We have met some fine people at this place. We arrived in the evening at 9 o'clock or day as at that time it was day at 3 o'clock and dark at 11. We went to a Red Men's lodge the

only secret order in town and we surely had a time.
"One man let us take his cabin on this most beautiful bay, Anita, 21 miles from town; the bay is 27 miles long, and we are at the extreme end with rocky snow capped peaks on our left and wooded on the right.

"We are on one of the large islands, Etolin. We bought our outfit for a year's camp, including a 21 foot double oar boat and landed here July 15. We went fishing up a river in the canyon for trout, caught seven the first day. They weighed from 1-2 to 2 pounds. Speckled beauties and a game fish. We next turned our attention to deer, killing our first one August 10, next on the 12th and two on the 15th. One on the 23th, making five in all. Not so bad for amateurs.

"The deer have been up in the mountains in the warm weather, but will come down now. August 10 we walked in snow for one-fourth of a mile on top of the mountain.

"We can go out most any time and get a deer but they have not been so plentiful in the last two years. The wolves have come on the island from the mainland and as far down the strait as Ketchikan they have made an appeal to Congress to put on a bounty. Some of the states have a bounty as high as \$25 a head for wolves. We have quite a number of traps ready to set for mink and marten when the fur is prime. We have sixteen tree traps set for marten on a blazed trail on the side of the mountain on three different kinds of trees, hemlock, spruce and the famous yellow cedar of Alaska; the latter is time for cabinet work. In a hotel in Wrangell the mineral case is made of yellow and red cedar.

We were up the river fishing one day and saw three black bears; the first one was within 40 feet of us, lying down, but he was soon off in the bush; the next one was in a meadow and the last one in the river on a rock fishing for salmon. We did not kill any of them as the fur will not be prime until October. We expect to get quite a few bear in the spring.

"I will close by sending my regards to all my friends. We are having a great time and wish they might be with us."

Who Wants Lustrous Hair, Full of Life and Beauty.

Start now madam, September is just the month to begin to acquire a glorious head of hair of which you will be justly proud during the social events of wintertime.

If you haven't used PARISIAN SAGE you aren't on the high road to hair beauty. PARISIAN SAGE is the most delightful preparation that destroys the dandruff germs and by so doing removes in a short time the cause of dandruff, falling hair, itching scalp, faded and lifeless hair.

Dandruff germs are obstructionists; they prevent the hair from receiving its proper nourishment by ravenously devouring the same nourishment. Use PARISIAN SAGE for one week and note the wonderful improvement.

SETTLEMENT OF STRIKE CAUSED BY WAR SCARE

London, Sept. 28.—Fear of war with Germany was what caused the speedy settlement of England's great railway strike. This fear was instilled into the minds of the railway magnates by the British government.

Although this information has been in the hands of a number of London newspaper editors for a week, none has yet seen fit to print it. Whether the government really believed war to be imminent is not known. But the final argument used by the officials in their efforts to induce the railway companies to agree to treat with the strikers was an appeal to their patriotism, as well as to their pocketbooks, is vouched for by one of the magnates who participated in the various conferences. To quote his own words, "We were beaten by Europe."

For two days the companies had held out obstinately in their determination to refuse any sort of recognition to the unions. The managers declined to meet the representatives of the Amalgamated Society of Railway Servants, even in the presence of the government officials. Suddenly the whole aspect of the situation changed. The strikers' committee was called into the government board of trade rooms and there they found the various railway presidents all ready to sign up an agreement providing for a settlement of the dispute by means of a commission whose decisions should be binding, even if absolute recognition of the unions should be involved. Sir Guy Granet, president of the Great Midland railway, who had been particularly bitter in his denunciation of the strikers, and who had declared only 24 hours before that he would see his road bankrupt rather than give in, was the first to put his name to the document.

The strike came at a peculiarly opportune time for the government to use the war argument. The negotiations between France and Germany over the Morocco question had reached the deadlock stage, and seemed on the verge of being abandoned altogether. The tone of the German press had become blatant to the point of belligerency, and the feeling of gloom in Berlin over England's internal troubles was unmistakable.

The railway managers were quick to see the point.

**GRANDMOTHERS
USED SAGE TEA**

To Darken the Hair and Restore Gray and Faded Hair to Its Natural Color.

It is easier to preserve the color of the hair than to restore it, although it is possible to do both. Our grandmothers understood the secret. They made a "sage tea," and their dark, glossy hair long after middle life was due to this fact. Our mothers have gray hairs before they are fifty, but they are beginning to appreciate the vision of our grandmothers in using "sage tea" for their hair and are fast following suit.

The present generation has the advantage of the past in that it can get a ready-to-use preparation called Wyeth's Sage and Sulphur Hair Remedy. As a scalp tonic and color restorer this preparation is vastly superior to the ordinary "sage tea" made by our grandmothers.

This remedy is sold under guarantee that the money will be refunded if it fails to do exactly as represented.

If your hair is losing color or coming out, start using Wyeth's Sage and Sulphur today, and see what a change it will make in a few days' time.

This preparation is offered to the public at 50 cents a bottle, and is recommended and sold by all druggists.

To The Women

Some women are just a trifle timid about going to a bank to transact business. And why? Simply because they are not familiar with the rules of banking. This shouldn't be so, and, indeed, this isn't so with those who come to this bank, for we aim to make every transaction so clear and so plain, that dealing with a bank soon becomes to them an easy habit.

We appreciate the patronage of women. Their business with us is already large and steadily increasing. If you are not now a patron, then please consider this invitation to become one.

It Isn't Their Job Therefore Housework Looks Beautiful to Some People

"It was Tom Sawyer and his white-washed fence," said the woman who writes for a living, "who first immortalized the joy of the other fellow's job. This explains, I suppose, the fact that the woman's magazines today are bubbling over with fan-tastic articles entitled, for example, 'Good Taste in Dish Washing' and 'How to Beautify the Garbage Pail.' The over-worked housewife, wearied by the monotony of three meals a day and all concomitant evils, is refreshed beyond all measure when she can snatch a few minutes from toil to peruse in the pages of her favorite home monthly inspirational articles which seem the very ebullitions of lofty souls able to rise above the sordidness of daily living and to dignify the scrubbing brush, the meat-chopper and the washtub. She is apt to feel discouraged with a sense of her own unworthiness as one abiding on a lower plane unless she recalls the fact that these enthusiastic articles are written by women whose whole task is to write about housework, not to perform it themselves in large doses.

"Hardly without exception women writers, doctors, lawyers, teachers and all others who earn their living with their brains rather than with their hands cannot say enough in praise of domestic duties. They speak, too, in all sincerity, for there is nothing more regenerating to the tired brain worker than the relaxation that comes from a complete change of employment, personified in their case by a dip into manual labor. They all have noted also that it is far easier to force one's hands than one's brains. Small wonder it is that the woman whose ordinary path of duty lies along scholastic lines welcomes the emergency call which points the way to the frying pan or the bread board. The suffragette is as proud of her shelf of jellies as Marie Antoinette of her model dairy, and for the same reason—it isn't her job."

The Art of Teamaking.

A GOOD cup of tea is something too infrequently met with when one considers the prevalent use of tea as beverage. The fault often lies less in the tea than in the manner of its making. Here are some of the rules which, if observed, will prove the quality of the product:

Don't use water that has been boiled a long time in brewing tea.

Don't use water which has not yet reached the boiling point.

Don't allow the tea to brew for more than five minutes.

Don't make tea in a cold teapot. Rinse with hot water before placing the leaves in the pot.

Don't pour a second water over the leaves when the first brew is exhausted.

Don't allow tea to grow damp in the caddy.

Don't buy too cheap a quality of tea and expect good results.

Here is the Japanese method of making a deliciously refreshing beverage: Heat the earthen or china teapot thoroughly with boiling water, then empty out the water and put in the tea. Pour in freshly boiled water, let it stand for five minutes and serve.

The teapot never touches the stove. A tiny tea cozy of Japanese paper is put over the teapot the moment the water is poured on, and a delicious cup of tea is thus secured without having extracted the injurious tannin.

Always use a porcelain or earthenware teapot. Tea experts tell us that the fragrant leaf should never touch metal.

All About the House

TO CLEAN CORDUROY. HOW many mothers have worried over the problem of cleaning baby's white corduroy coat satisfied with and without having recourse to the professional cleaner.

The garments may be cleaned as often as necessary if these directions are remembered:

Shave very thinly a bar of some pure soap, add with two tablespoonfuls of kerosene to about half a pail of water. Boll this mixture until it is reduced to one quarter. Use a small portion of this and plenty of water to cleanse the garment. When sufficiently cleansed, hold the garment, spread out as much as possible while you rinse it up and down in clear cold water repeatedly. Be careful to have the nap running up.

When the pile is raised hang in the same position to dry. Be careful not to wring or otherwise touch the garment. It should be fastened to the line with ordinary clothespins. If by some oversight the nap becomes flattened wait until the place is thoroughly dry, when a brisk rubbing with a hand brush will obviate the trouble.

SKIRT PADS. SOME dressmakers frequently have difficulty in making skirts cut with the raised waist line hang straight in front at the line of the normal waist. At this point the skirt breaks and is apt to show an ugly wrinkle, especially when the wearer is seated.

This can be obviated by making a small oblong pad of the skirt material and inserting it directly in front. The pad is made four inches long and two inches wide and is placed lengthwise with the waist. It can be tacked in place.

COPPER CASSEROLES. AMONG the novelties for the table are tiny individual copper casseroles. These are highly bronzed and have

What Is New, Smart and Exclusive In the Season's fashionable furs

LATEST STYLES IN MARABOU SETS FOR THE AUTUMN

Nothing is softer and more becoming to the face than marabou, and for an in between season set to don before it is really cold enough for fur the marabou muff and neck pieces are just the thing. The illustration shows the latest developments in these feathery accessories combined with handsome brocades, satins and velvets.

THE most interesting news concerning the mode in pelts is the introduction of tailor made suits in fur with an accompanying hand bag to match. The skins used are moleskin and broadtail, the latter further beautified with trimmings of ermine. In cut the fur tailored suit resembles its sister of cloth construction. Skirts are narrow and jackets short and semifitting. The fur bags carried with these costumes are huge affairs finished at the bottom with a deep fringe of silk.

The novelty fur of the season is silver seal, and as this skin seldom comes out in the same tone the pelt will be used almost exclusively by milliners in their creations. Another pelt that is rather new is the fur of the gray wolf, which makes up into delectable scarf and muff sets. By the way, these scarfs are extremely wide and long, reaching in many instances to the hem of the skirt.

Muffs will continue to be large, with a soft padding, giving some thickness, and one finds the most costly furs

made up into flat, roundish muffs with a deep, heavy fringe of the same color across the bottom. The large, fat bolster muff so much carried last winter is not among the new showings. It has been replaced by a triangular creation, which is even bigger and more imposing than the bolster effect. The deep point of this triangular muff hanging low when carried is rather effective, but it remains to be seen whether it will be taken up by conservative women.

In decided contrast to the wide scarfs and stoles are the tiny cravats of sealskin and moleskin worked out in mosaic patterns. These pieces are about six inches deep and fit snugly around the throat.

Coats in imitation and the cheaper furs are made up in long, loose kimono shapes, making them easy to slip on over dressy frocks, but seal, mink and sable are not often cut in fancy shapes which are apt to go out of style quickly. These models take the form of short jackets, with braid and button trimmings, or box coats for motoring and driving, and are cut on the

regulation ulster lines, with fitted sleeves.

Maribou will share honors with the fashionable furs the coming winter. In connection with maribou effects there are other feather novelties of a striking character this season.

Why should a waist belt made of feathers be one of fashion's contributions to the autumn program unless it be with a view to pleasing those who rejoice in novelties? It is not a sensible suggestion, but small feathers closely packed together are deemed very smart now. They are the feathers of barn door fowls and game birds that are used, dyed to meet the needs of their manipulators.

A pair of bouclé shoes is made all of glossy brown feathers, mingled with the metallic green that is seen in plumage so often now. There are millinery hats, too, which take the place of ribbon upon felt hats, and with their usual delightful inconsequence the brims of such hats are in some cases made of white net elaborately embroidered with white floss silk.

CATHERINE TALBOT.

HANDSOME WRAP OF BROADTAIL.

THIS sumptuous lousine wrap designed for wear over afternoon reception and bridge gowns shows the West End mark in every line and in the well chosen combination of material. The wrap is of broadtail heavily embroidered with chenille. The lining is of Farrow & Linn in dull rose, blue and mauve shades, and this lining is exposed in coloring by the brocade velvet cape collar which tucks back over the shoulders of the garment. A bit of the velvet appears also in the sleeve.

THE BIAS FASTENING.

It is one of the new fashions to fasten a skirt on the bias from the right hip over to the left knee. Blouses are also fastened in this diagonal fashion. The idea was brought about by the innovation of one sided opening on many of the new gowns.

Jabots Worn on Heart Side

THE fancy which has sprung up this year for the jabot has become almost universal. The new effects are far removed from the slim and contrived jabots which were worn ten years ago. The most fashionable ones at present measure not less than twelve inches in width and starting quite high on the shoulder, finish in point at the waist like a large revers. The side frill illustrated is of this type.

FRILL OF LAWN AND LACE.

The new jabot is worn on the heart side, but there is nothing sentimental in keeping it daintily crisp and clean.

Any woman who is reasonably expert with her needle should be able to copy this very smart looking stock and side frill of fine white net and flannel lace. The stock, generously boned, is of finely tucked net bordered with narrow edging, and the closely gathered triangular shaped frill is bordered on the short and one long side with wide flannel edging.

A VACUUM WASHER.

A device if it does what is claimed for it should be welcomed with joy by every wise and careful housewife. It has recently been exhibited in Australia. It is a vacuum clothes washer in a form so compact that, placed in an ordinary wash boiler, it forces boiling water through the clothes at a rate of four gallons or more a minute. The cleansing powers of this operation will be readily appreciated, and it is carried on absolutely without wear and tear upon the garments subjected to it.

Cookery Notes

SAVORY SCRAM-BLED EGGS. SAVORY scrambled eggs, which belong to the same peppery foreign family as Spanish omelet, is a favorite breakfast of lemon juice in many families. A dozen fresh green peppers are roasted a few minutes, then peeled and all the bitter seeds and membranes removed. Chop them up, cook in a very little water till tender and butter well. Six or eight eggs are then beaten as usual, salted and added to the peppers, and the whole is fried for a few minutes in hot butter.

GRAPEFRUIT JELLY.

This makes a delicious sweet for Sunday night supper. Soak two and one-half level tablespoonfuls of granulated gelatin in one-half cupful of cold water for fifteen minutes, add one cupful of boiling water, three-fourths of a cupful of sugar and one tablespoonful of lemon juice. Keep hot over boiling water till the gelatin is thoroughly dissolved, then strain. Add three tablespoonfuls of pineapple juice and one and three-fourths of a cupful of grapefruit juice. Turn into a mold which has been wet with cold water and set the jelly aside to harden. Pieces of the grapefruit pulp may be added if desired.

VILLAGE CUSTARD.

M. Lafarge, chef of a famous New York hotel, is responsible for this recipe, which, he says, is a meal in itself. The custard is prepared by saturating five ounces of dry biscuits with kirsch and placing them in a deep dish with alternate layers of seasonable fruit, such as pears, apples or peaches. Mix together a half pound of powdered sugar, eight eggs and the yellow of four eggs diluted with three-quarters of a pint of milk. Pour over the biscuits and fruit and poach in the oven, being careful not to let boil.

SAVING THE INVALID'S NERVES.

Slipshod petticoats, starch wearables and creaking shoes should be avoided by the attendant in an invalid's room. Whispering is intensely irritating to a sick person, who naturally concludes that his symptoms are so bad that they have to be discussed in an undertone. Conversation between the nurse and visitor should be in a low tone of voice, but quite distinct. If there is anything to be said that the invalid must not hear it had better be said in the hall, entirely out of his sight, earshot and imagination. A small table in the hall, outside the sickroom, will be appreciated by the nurse and by whoever has to deliver and call for the invalid's food tray.

PERSIAN brocade in a pattern combining blue and gray tones has been used as the foundation material for this muff and collar set, the fur trimming being the soft, rich Australian pelt, which resembles chinchilla very closely. The collar has long stole ends weighted with tassels of gray chenille.

Try This Beauty Sleep

About once a month try this beauty sleep. Sleep twice around the clock and see how rested and refreshed you will feel. At first the restless mind, the very one that needs the treatment most, will say, "Oh, I should go mad lying in bed all that time," but if tried systematically it is not a hardship. Self suggestion plays an important part. When retiring at night impress upon your mind the idea that you need not awaken the next morning. When you do awaken naturally have a light

A TROUBLE SAVER.

When washing children's dresses or underwear with ribbon drawn through, the following is a good plan and saves a lot of trouble, as no bodkin is required: Sew or pin to the end of the ribbon a piece of tape of the same length. Pull the ribbon out of the garment, leaving the tape in its place. When the garment is washed the ribbon is replaced in the same way.

It fills a Long felt Want

THE NEW SHOE SHINER.

WITH this simple piece of mechanism any woman may be her own shoe shiner, for she has only to place her boots, shoes or pumps over the properly sized form, fit it to the tip of the iron nose, clamp it firmly and apply the black, tan or white polish.

STATUE TO MOTHER-IN-LAW.

The mother-in-law is usually considered a very annoying and troublesome person, who is indirectly associated with all the worries between husband and wife. It is therefore surprising to record the tribute to a mother-in-law from her son's wife, no less a personage than the English Queen-Mother Alexandra. In the royal mausoleum at Frogmore is a beautiful statue of our Saviour, which was sent from Denmark by Alexandra's order, and on the base are inscribed the words "In memory of the best of mothers-in-law."

Tailored Suits of Moleskin and Broad-tail With Bag to Match

MODISH SET OF AUSTRALIAN CHINCHILLA.

The Value of System In the Household

IT is not the woman who rushes in madly who accomplishes most. System is what counts. Have certain hours for certain duties.

Give yourself plenty of time for the performance of each duty, but no more than you are entitled to according to your plans made beforehand.

Five minutes' reflection at night is worth more than an hour's rush in the morning.

Let the busy woman see that her clothes are in order for the next day, that she has a clean change of linen with all the buttons on, that her shoes are well polished and her gloves and belt laid in plain sight.

If everything is at hand she should be able to take her bath and dress in half an hour. Then she may eat a leisurely breakfast and be ready for a good day's work.

That's what a little planning and foresight will do for her.

The woman whose house is run in the best order, who keeps her help the longest and has them best trained has a day for each duty.

She can in this way accomplish part of her work before her mistress is up, as well as plan tomorrow's labor the way her mistress does.

Method should always be used with respect to children. A child who knows what is expected to do at a certain hour will eventually be trained into the routine of doing it, thus saving its mother many precious minutes.

The woman who has no method might just as well give up trying to accomplish anything in this world. She loses too much time through lack of forethought and planning.

Winterhalter Girls

THE appreciation for sloping shoulders, a synonym for all that was shrinking and tender and essentially feminine in the middle of the last century, is noticed again this season, and the evening aspect of many a winter's debutante will be that of Winterhalter's portraits of the beauties of 1840 and thereabouts. The corsage is worn low upon the shoulders, and the outline is very simple. A few folds of gauze drawn beneath a large rose in the center suggest the bertha of old times that made so beautiful a frame for the figure.

Many girls of today have a charming facility for adapting the prettiest fashions of early Victorian days, improving upon them. It is needless to say. They dress their hair with the simple and demure grace of that period without its severity and wear the chaplet of leaves and foliage that used to be almost an essential badge of girlhood with a new and very alluring grace.

Hand Bags to Be Smaller

THERE is every indication that hand bags are going to be smaller this fall than for several seasons. Women are tired of carrying bags as cumbersome as suit cases, wherever they go. Even the bag made like the dress follows the same tendency to shrink in size.

All that is needed to fill a bag that goes with a gown are a few toilet accessories, and there is no use in the clumsy things that have been serving the purpose. Cords to bags are also becoming shorter, though for bags that match gowns the cord must be long enough to swing the receptacle from the wrist. The Japanese bags with celluloid bars across the front and back each side the opening are the ones in general use.

Jewel Box In Bedstead

A WOMAN having a horror of burglars after having thought of all manner of means of keeping her jewelry safe has had one of the posts of her bedstead hollowed out to make a safe hiding place for her treasures.

The jewels cannot be discovered by unscrewing the part about the hollowed out receptacle, for, although there is a removable head at the top of the post, there is also a second very cleverly arranged pediment, which must be removed before the receptacle in which the jewels are placed can be found.

A SIMPLE PRECAUTION.

The wise woman sent a sudden vigorous puff of breath at the jet of steam rising from the copper teakettle she was tilting and repeated it hastily as she filled the blue pot and set the kettle back on the stove with a nod of triumph. "That trick has saved me many a scalded hand," she asserted. "Whether I read it or was told it I am not sure, but until I tried it I was always getting the most painful burns."

TIME TO START PLANTS FOR WINDOW GARDEN

NOW is a good time to start your plants for the winter window garden. If care is taken in the selection of plants suitable for the situation to be given them, one can avoid disappointment. Many things will not grow in a house heated by gas, or even lighted by gas, unless certain precautions are taken, and these precautions vary with the kind of plants selected and the light given them.

For a west window geraniums and more geraniums are the very best for ordinary culture. All heat loving plants possess some powers of resistance to the obstacles to growth presented by the average west window. If one can have an east window many more things may be tried, the variety being larger. For a south window about all sunshine loving plants may be chosen, according to taste. For a north window the choice is more limited, but many beautiful things will grow in a north window where a good light can be had. Many plants will defy disaster if given the proper degree of moisture in the air, but few plants will grow and flourish with wet feet or in water soured soil.

All these things must be given attention when choosing for the window garden, and it is well to remember that plants are like children and require individual care, even plants of the same kind needing different care at times. Be sure to take a good floral magazine, one not too much devoted to the nursery interests of the editor and publisher. Unless you know something of plant culture you will make a bad job of even the fewest and hardest, but a little knowledge and a determination to learn, coupled with a real love for your plants, will go a long way toward success.

Many pot shrubs may be started from seeds and the plants be well along by the time for removal to the house. Many plants must be potted and the pots sunk in the soil under conditions to sunlight most agreeable to them. Some do best in entire shade—that is, freedom from the glare of the sunshine, though in strong light. Others require the hottest spot in the garden, but every one of them must be given care and attention as to moisture if growth is desired.

Indian women as well as Indian men will attend the conference. Representatives of every

WILL TRIPOLI PROVE WORTH FIGHTING FOR

Rome, Sept. 28.—That there is a serious question whether Tripoli will prove worth fighting for as a colonial possibility was admitted in a statement prepared exclusively for the United Press today by Guglielmo Ferrero, the famous Italian historian, whose "Greatness and Decadence of Rome" ranks as one of the greatest modern historical works.

All that can be done, he said, was not intended either as an argument for or against occupation of Tripoli, but merely a note of warning to the impulsiveness and enthusiastic expectations of the Italian people at a time when they seem bent on forcing their government to begin a system of colonial expansion similar to that of France and Germany.

The statement follows:
By Guglielmo Ferrero.
(Copyright 1911 by United Press.)
A people is at liberty to choose or not to choose when it wants colonies. If it chooses to want them and seeks to found them, there can be proposed no other means save to occupy territory that is still poor, that is still semi-empty, or that for a long time has been semi-barbarous, for the purpose of attempting to augment its value, investing in it, wisely, the capital necessary to bring it about. Territory already rich, developed and blossoming, can only be found in countries of an older civilization. The profit, therefore, of a colonial undertaking can only be measured according to the probability of the territory which is to be made the subject of the undertaking, easily and rapidly increasing and growing in value.

But this is a problem that in the majority of instances human wisdom has been impotent to solve. There are few things that history can demonstrate to man; but in the failure of predictions for states and territories it can. All surprises are possible, so are also all delusions in the infinite changing of human vicissitudes, the aspirations, the ideals and the needs of humanity.

Two centuries ago, for example, in the new countries, the hot territories had a greater value than those in a more temperate zone. But a century later, when there came all the grand industrial and all the mechanical inventions of modern civilization, the value of the former had declined, while the value of the latter had increased.

A century ago the immense plains in which Argentine sows its cereals and reaps such great masses of riches, were only a desert and without value. But the overflow of European population, the growing demand for cereals, the progress of navigation and the railroad has converted in 50 years the desert into an Eldorado.

All of this merely goes to show that in a colonial policy, as in other things human, much depends upon good fortune, while the element of time is also one of the most important elements of success. The only sure rule, then, for a state to follow if it wishes to inaugurate and carry out a colonial policy is to take that which it can without excessive cost and danger, and then to wait.

It is not possible to make a colonial empire bear fruit like a plain already fully established; but it is necessary that it be allowed to fructify according to the circumstances, following the current of the times and

important American tribe will be present—Iroquois, Sioux, Apaches, Crow, Osages, Umatillas, etc.

keeping always well in mind that human fortunes are perennially moving and changing; that in the world nothing is stable and eternal, not even the value of territory; not even the power of the state; not even the greatness of the people.

FOR CONSTIPATION

A Medicine That Does Not Cost Anything Unless It Satisfies.

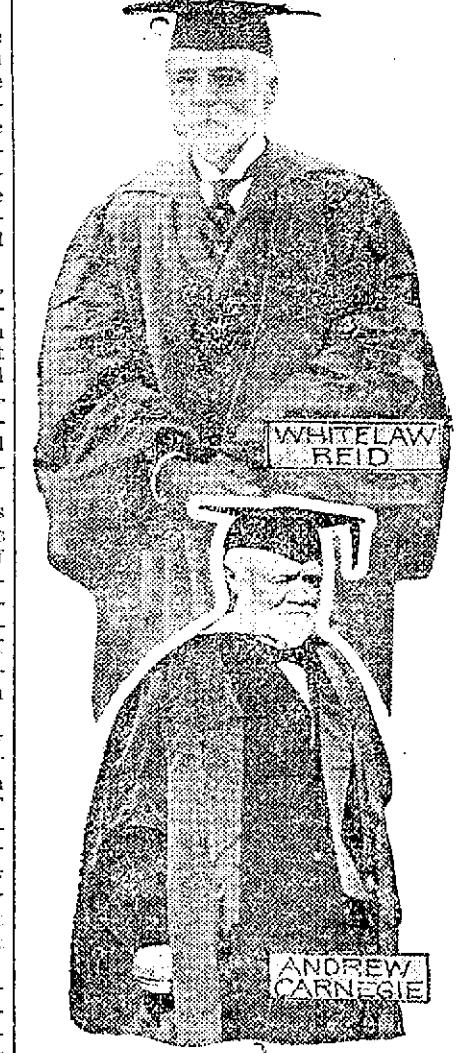

The active medicinal ingredients of Rexall Orderlies, which is odorless, tasteless and colorless, is an entirely new discovery. Combined with other extremely valuable ingredients, it forms a perfect bowel regulator, intestinal invigorator and strengthener. Rexall Orderlies are eaten like candy, and are notable for their agreeableness to the palate and gentleness of action. They do not cause griping or any disagreeable effect or inconvenience.

Unlike other preparations for a like purpose, they do not create a habit, but instead they overcome the cause of habit acquired through the use of ordinary laxatives, cathartics and harsh physic, and permanently remove the cause of constipation or irregular bowel action.

We will refund your money without argument if they do not do as we say they will. Three sizes, 50c., 25c. and 10c. Sold only at our store—the Rexall Store, Frank D. Hall, 10 North Side Square.

NEWARK SURELY IS RECEIVING MUCH NOTORIETY

Wednesday morning's Ohio State Journal carried a special sent out from this city, which certainly did a great injustice to the city's name and which was copied by papers all over the state. It is just such misrepresentations that give our city a black eye and cause the name of Newark to be maligned.

Mayor John Ankele will take the matter up with the Columbus publication and ask that a correction be made regarding the incident, which had its inception in the fact that a number of people gathered after a theatrical performance to "roast" the actors who had bunched them out of their money.

A sample of some of the free advertising which the city is receiving follows, it being taken from the Zanesville Signal:

Jim England, the Zanesville man who is at the theatrical helm in Newark, is having a strenuous time these days and it is reasonably certain that "Jeems," for a few minutes last evening at least, wished he was back in that dear Zanesville, also that the appetites of some Newark people are still whetted for blood, which seems to be characteristic of the hoodlum class, is evidenced by the following Newark special:

"A crowd of 100 gallery gods at the Auditorium theatre last evening became displeased with the performance of 'The Girl and the Prince,' and stormed the box office, demanding their money. Later they attempted to attack the performers, and in this they were joined by 200 grown persons. The entire police force, with ambulances and patrol wagons, was rushed to the scene. Several persons suffered slight injuries. Nearly an hour elapsed before the crowd was dispersed."

BEAUTY MORE THAN "SKIN DEEP"

"Beauty," said a well known teacher of calisthenics, "is more than 'skin deep,' for no matter how good a complexion may be, a pretty face with a scrawny neck and underdeveloped bust does not constitute true beauty. While I advise exercise and plenty of fresh air for all women, yet there are many instances where such methods are insufficient and in cases of that kind I invariably prescribe the Vaucaire treatment, which was introduced into France many years ago and used successfully by the women of that country ever since. The chief ingredient—gallol—has a wonderful tonic value, and if used faithfully, feeds the delicate tissues and rounds out the sunken or undeveloped parts of the anatomy, giving to every woman's form those graceful lines of beauty so much admired by the sterner sex.

"To prepare this simple treatment get one ounce of gallol from your druggist; then take one and one-half cups of granulated sugar and add enough water to make a pint of syrup. Add to this the gallol (but be sure it is the true gallol), and take two teaspoonfuls twice or three times each day and you will soon produce the desired results."
